ABOUT ME

An developer having worked in different industries predominantly in AR/VR and Game Development, Currently trying to intertwine technical and creative aspect by actively learning skills and currently pursuing Masters in Interaction and Experience Design, University of Limerick to gain the necessary design skill required for blending the boundaries of technology and user experience. I bring a global perspective and diverse industry experience, dedicated to making digital experiences as engaging and impactful as possible.

WORK EXPERIENCE

Games programmer

Oct 2022 – Apr 2024

Pixcellplay (originally Nokout)

Chennai, India

- Developed Hacked and Word mastermind in entirety using Unity C# and also engagement enhancing features in Route 66 Game.
- Designed and implemented features as a plug-and-play components, reducing development time by 40% across different projects. Created PVP Framework (pseudo PVP) and Tournament Frame to be used across game
- Developed and deployed cloud functions in rebase to support push notifications increasing the player retention and re-engagement by at least 20%.
- Created events framework that allows the game to create seasonal, timed, and permanent events from time to time that increased player retention by 20%.
- Mentored juniors on optimization and SOLID principles for game development leading to a 35% reduction in debugging time.
- Created company website and designed it using React framework and worked on server-side implementation of all the games using Firebase

Games programmer

Jun 2022 – Sep 2022

Nokout

Chennai, India

- Created a custom universal plug and play dictionary framework for games to load words, thus reducing the time to implement the dictionary across games by 20%.
- Developed and deployed cloud functions in firebase to support push notifications and worked on server-side implementation of all the games using Firebase
- Developed the same iterations of the Hacked and Word mastermind in cocos2D JavaScript and react to test it across different platforms

Unity Developer

Sep 2021 – Jun 2022

Inspirit VR

Remote, United States of America

- Developed Educational Simulations for STEM concepts such as Law of definite proportions, concentration of solution using Unity C#.
- Worked on the AR education application and the online WebGL app using react and three js for running simulations.
- Developed the scenes necessary for the STEM simulation that can be understood by younger audience in a record time by iteratively collaborating with the subject matter expert.
- Solved a memory leak issue in the WebGL app reducing memory footprint by 12%

Game Programmer

Jun 2021 – Aug 2021

Foretell

Chennai, India

- Created generic RNG framework as Unity asset using C# in unity to be used for all games.
- As a founding developer setup the company coding standards and CI/CD pipeline for the company.
- Mentored the new trainee and juniors on coding standards, SOLID principle thus allowing those individuals to code with extensibility and re-usability in their mind.
- Designed core mechanics along with programming them

Junior Programmer

Aug 2018 – May 2021

Hard N Soft Technologies

Chennai, India

- Spearheaded the development of the R&D for AR/VR and created proof of concept projects, using these projects we were able to successfully secure projects from the clients for which I was awarded as the best performer of the quarter of 2019
- Developed AR application that solves furniture and garden decoration problems by leveraging Unity C# and AR Kit.
- Developed an automobile-based AR application that allows people to visualize car features and customize them.
- Worked closely with team at Ford APAC and Audi for delivering the AR experience needed.

Web Programmer

Aug 2016 – Jun 2017

Viralbac

Chennai, India

- Work closely with clients to Develop their website using HTML,CSS and react java script.
- Worked on Designing a modular solution that can be used company wide for rapid prototype using react
- Assisted clients with creating SEO for their page by finding the right Keyword and worked with clients on regular basis to understand their SEO ranking and strategize plans to improve SEO of their websites.
- Develop a website using React framework, WordPress and PHP for standalone and single landing page website.
- Design websites using Adobe XD.

EDUCATION

Masters in Interaction and Experience Design

Sep 2024 – Sep 2025

University of Limerick

Limerick, Ireland

Post Graduate Diploma in Game Development

Sep 2017 – Aug 2018

ICAT Design and Media College

Chennai, India

Bachelors Of Engineering Computer Science

Sep 2012 – Apr 2016

St Joseph's Institute of Technology

Chennai, India
